

Website design

This website was developed (and is maintained) by [In Petto](http://www.inpetto.be), using a content management system (CMS) named [Drupal](#).

Apart from developing websites, In Petto also offers solutions and services such as:

- Internet security using [digital certificates](#).
- [Optimize websites](#) in the context of moving up in the ranking in search engines such as google, etc.
- [Software escrow](#), which is depositing source code of all sorts of software programs and which protects users of proprietary (compiled) software against a software vendor going out of business because of (e.g.) bankruptcy (a modern equivalent of what used to be done in the past via a traditional notary office using floppy disks and/or CD ROMs).

More [information about such CMS](#) and/or about In Petto is available on the [In Petto website](#).
